Today, on Tu Ingles Sesion 22, we are going to begin with a discussion of Colombia. Vamos a hablar del país Colombia.

I have never been to Colombia. But I have heard some wonderful things about the country. Of course, I have also heard some bad things. He oído cosas buenas y malas. Probably you have also heard the stories about narcotics and terrorism.

But I really want to visit Colombia someday.

Today I would like to talk about Colombia’s reputation as a tourist destination. It’s a delicate subject. Es un asunto delicado. But I hope we can learn some things together.

Fortunately, we have our friend Cecilia, in Mexico, to help us again today.

Colombia is an amazing country in South America. It is famous for everything from its coffee and high literacy rate to its beaches, cities, and historical places.

But if you are from the United States, and you want to travel to Colombia, the United States government has some advice for you.

According to the U.S. Department of State, it is dangerous to travel to Colombia. The threat of kidnapping and terrorism has gone down significantly. But the U.S. government says the potential for violence by terrorists and other criminals still exists in all parts of the country, especially in rural areas.

When U.S. government officials and their families visit Colombia, they are not allowed to travel by bus. They can only travel by air. And they can not travel by road outside of cities at night.

The State Department recommends that all Americans who visit Colombia follow these rules.

The State Department website offers some suggestions for avoiding crime in Colombia. It warns that many robberies occur at automatic teller machines or ATMs. In addition, Americans should also avoid riding in taxis in the city of Bogota, because of the risk of robbery.

The US government says you also have to be wary of robbers in airports and on hiking trails.

Even when you are in a bar or restaurant, you have to be on your guard. Sometimes tourists have been given what the government calls “disabling drugs.” The drugs apparently enable criminals to rob or sexually assault their victims.

OK, so if you believe the U.S. State Department, maybe Colombia is not a safe place to visit.
But wait. In 2006, Colombia received over 1.5 million international visitors. This was an increase of about 50% from 2005. Also in 2006, a publisher of tour guides, called *Lonely Planet*, chose Colombia as one of the top 10 world destinations for 2006.

The increase in tourism has helped Colombia’s economy. In fact, 2007 is regarded as one of the best economic years in Colombia’s recent history.

While the crime problem in Colombia has improved a lot recently, obviously the situation is not perfect. The city of Medellin recently celebrated “La Feria de las Flores.” It is a big tourist event. But a Colombian friend recently told me she was afraid to go out and celebrate the Festival of Flowers … because she was worried about crime.

But most Colombians are very proud of their country and their heritage. On the Facebook site, there are more than 500 groups about Colombia. Some of the names include, “I Love Colombia” and “Colombia Soy Yo.” There is even a group about travelling in Colombia. It is called “Colombia, el riesgo es que te quieras quedar.”

“Colombia, the risk is that you will want to stay.”

And in 2006, approximately 42,000 Colombians obtained legal permanent resident status in the United States. That is more than any other south American country. Peru was second with just over 21,000.
